

DOOR STOPPER

SERIES | 

ZT-A001

SERIES DOOR CLOSER

Power level \ 2#

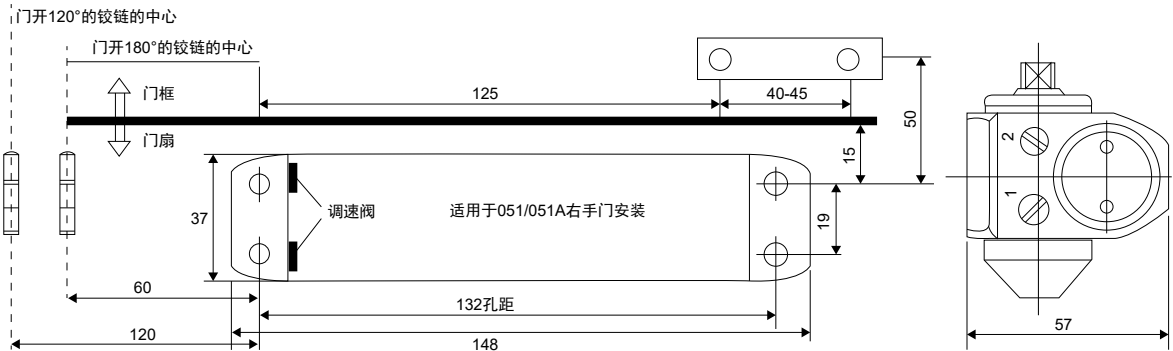

- ★ Double speed full-section control(180°-15°)door closing speed adjustable, (15°-0°) lock-entering speed adjustable.
- ★ The body is quality die-cast aluminum alloy,with 3-layer bright paint protection.(The color can be customized)
- ★ Quality alloy steel gear; piston features additional 3-process precision treatment for assured product quality.
- ★ Adopts imported sealing ring, needle bearing and high-performance spring structure design, which greatly increase leakage prevention, low-temperature and mechanical properties, so that the door closer is more stable and reliable.

Technical data

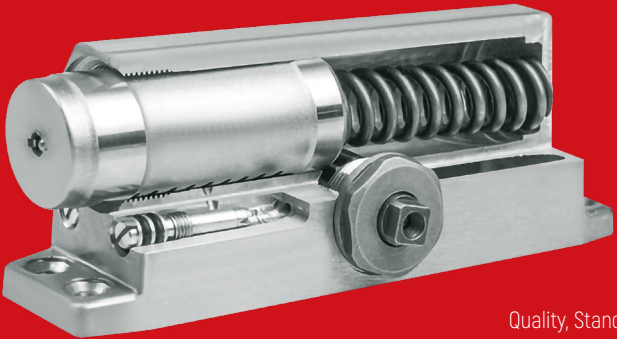

-  All metal & plastic door
-  Max door width | ≤ 950mm
-  Max door weight | ≤ 45Kg
-  Function: 90° positioning and 180° non positioning

Model	Material	Surface Treatment	Color	Max door weight	Max door width	Dimensions & Hole Center Spacing
ZT-A001	Aluminum Alloy	Spray painting	Silver	45kg	950mm	132*19

Precision Door Control
Hardware

Quality, Stand the test of time
Multiple parts and multiple processes

Power level \ 3#

- ★ Double speed full-section control(180°-15°)door closing speed adjustable, (15°-0°) lock-entering speed adjustable.
- ★ The body is quality die-cast aluminum alloy,with 3-layer bright paint protection.(The color can be customized)
- ★ Quality alloy steel gear; piston features additional 3-process precision treatment for assured product quality.
- ★ Adopts imported sealing ring, needle bearing and high-performance spring structure design, which greatly increase leakage prevention, low-temperature and mechanical properties, so that the door closer is more stable and reliable.

Technical data

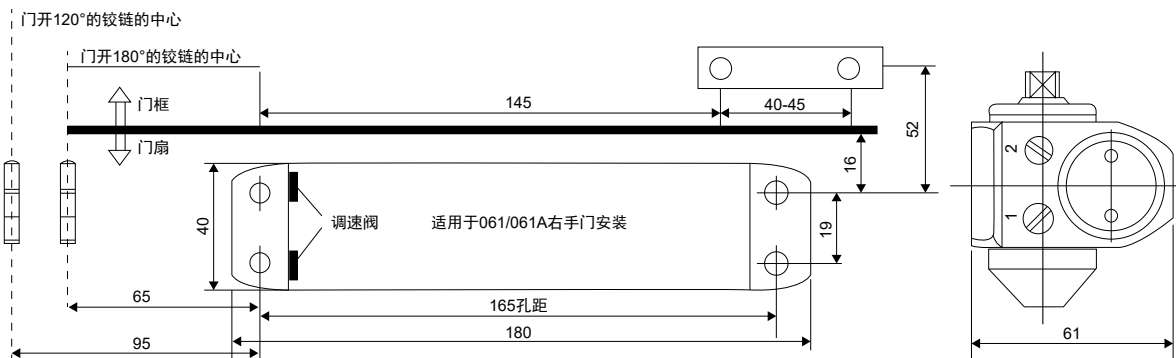

-  All metal &plastic door
-  Max door width | ≤ 1000mm
-  Max door weight | ≤ 65Kg
-  Function: 90° positioning and 180° non positioning

ZT-A002

SERIES DOOR CLOSER

Model	Material	Surface Treatment	Color	Max door weight	Max door width	Dimensions & Hole Center Spacing
ZT-A002	Aluminum Alloy	Spray painting	Silver	65kg	1000mm	165*19

Power level \ 4#

- ★ Double speed full-section control(180°-15°)door closing speed adjustable, (15°-0°) lock-entering speed adjustable.
- ★ The body is quality die-cast aluminum alloy,with 3-layer bright paint protection.(The color can be customized)
- ★ Quality alloy steel gear; piston features additional 3-process precision treatment for assured product quality.
- ★ Adopts imported sealing ring, needle bearing and high-performance spring structure design, which greatly increase leakage prevention, low-temperature and mechanical properties, so that the door closer is more stable and reliable.

Technical data

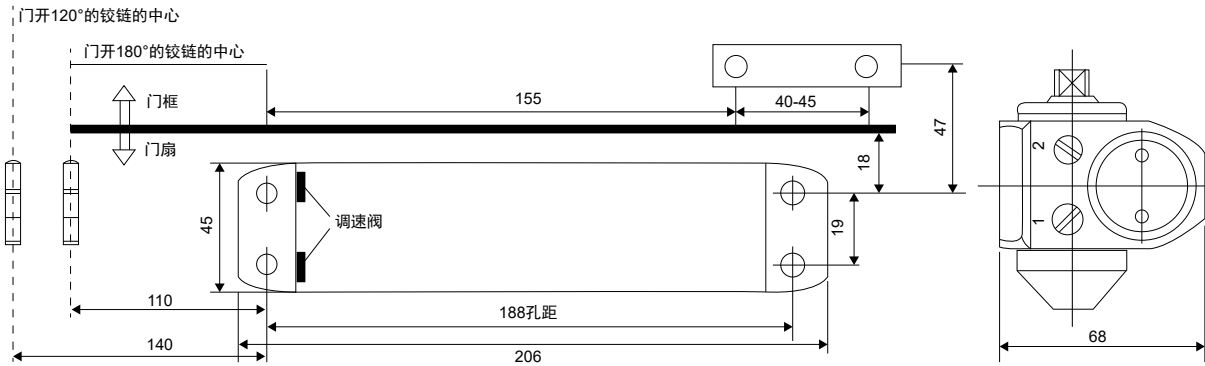

-  All metal &plastic door
-  Max door width | ≤ 1200mm
-  Max door weight | ≤ 85Kg
-  Function: 90° positioning and 180° non positioning

ZT-A003

SERIES DOOR CLOSER

Model	Material	Surface Treatment	Color	Max door weight	Max door width	Dimensions & Hole Center Spacing
ZT-A003	Aluminum Alloy	Spray painting	Silver	85kg	1200mm	188*19

Power level \ 5#

- ★ Double speed full-section control(180°-15°)door closing speed adjustable, (15°-0°) lock-entering speed adjustable.
- ★ The body is quality die-cast aluminum alloy,with 3-layer bright paint protection.(The color can be customized)
- ★ Quality alloy steel gear; piston features additional 3-process precision treatment for assured product quality.
- ★ Adopts imported sealing ring, needle bearing and high-performance spring structure design, which greatly increase leakage prevention, low-temperature and mechanical properties, so that the door closer is more stable and reliable.

Technical data

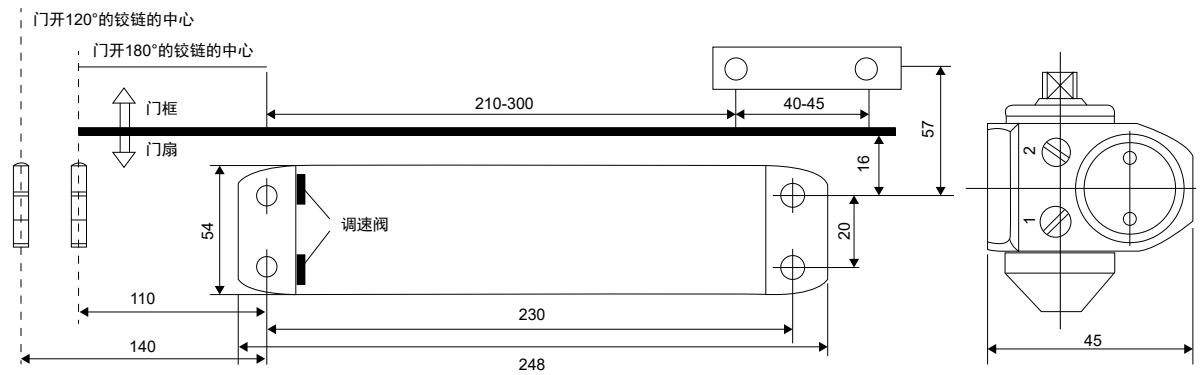

-  All metal &plastic door
-  Max door width | $\leq 1300\text{mm}$
-  Max door weight | $\leq 100\text{-}180\text{Kg}$
-  Function: 90° positioning and 180° non positioning

ZT-A004

SERIES DOOR CLOSER

Model	Material	Surface Treatment	Color	Max door weight	Max door width	Dimensions & Hole Center Spacing
ZT-A004	Aluminum Alloy	Spray painting	Silver	100-180kg	1300mm	230*19

Power level \ 3#

- ★ Double speed full-section control(180°-15°)door closing speed adjustable, (15°-0°) lock-entering speed adjustable.
- ★ The body is quality die-cast aluminum alloy,with 3-layer bright paint protection.(The color can be customized)
- ★ Quality alloy steel gear; piston features additional 3-process precision treatment for assured product quality.
- ★ Adopts imported sealing ring, needle bearing and high-performance spring structure design, which greatly increase leakage prevention, low-temperature and mechanical properties, so that the door closer is more stable and reliable.

Technical data

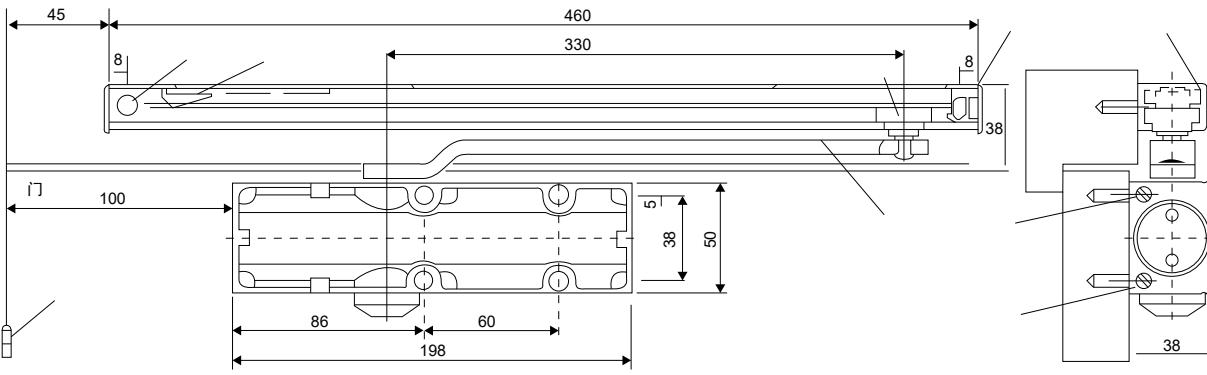

-  All metal &plastic door
-  Max door width | $\leq 1000\text{mm}$
-  Max door weight | $\leq 65\text{Kg}$
-  Function: 90° positioning and 180° non positioning

ZT-A005

SERIES DOOR CLOSER

Model	Material	Surface Treatment	Color	Max door weight	Max door width	Dimensions & Hole Center Spacing
ZT-A005	Aluminum Alloy	Spray painting	Silver	65kg	1000mm	/

Power level \ 4#

- ★ Double speed full-section control(180°-15°)door closing speed adjustable, (15°-0°) lock-entering speed adjustable.
- ★ The body is quality die-cast aluminum alloy,with 3-layer bright paint protection.(The color can be customized)
- ★ Quality alloy steel gear; piston features additional 3-process precision treatment for assured product quality.
- ★ Adopts imported sealing ring, needle bearing and high-performance spring structure design, which greatly increase leakage prevention, low-temperature and mechanical properties, so that the door closer is more stable and reliable.

Technical data

- 

All metal &plastic door
- 

Max door width | **≤ 1200mm**
- 

Max door weight | **≤ 85Kg**
- 

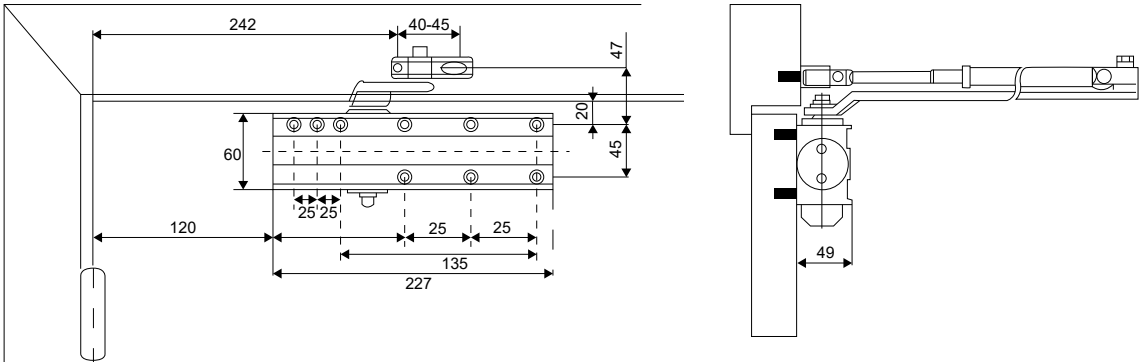

Function: 90° positioning and 180° non positioning

ZT-A006

SERIES DOOR CLOSER

Model	Material	Surface Treatment	Color	Max door weight	Max door width	Dimensions & Hole Center Spacing
ZT-A006	Aluminum Alloy	Spray painting	Silver	85kg	1200mm	/

Power level \ 3#

- ★ Double speed full-section control(180°-15°)door closing speed adjustable, (15°-0°) lock-entering speed adjustable.
- ★ The body is quality die-cast aluminum alloy,with 3-layer bright paint protection.(The color can be customized)
- ★ Quality alloy steel gear; piston features additional 3-process precision treatment for assured product quality.
- ★ Adopts imported sealing ring, needle bearing and high-performance spring structure design, which greatly increase leakage prevention, low-temperature and mechanical properties, so that the door closer is more stable and reliable.

Technical data

- 

All metal &plastic door
- 

Max door width | **≤ 1000mm**
- 

Max door weight | **≤ 65Kg**
- 

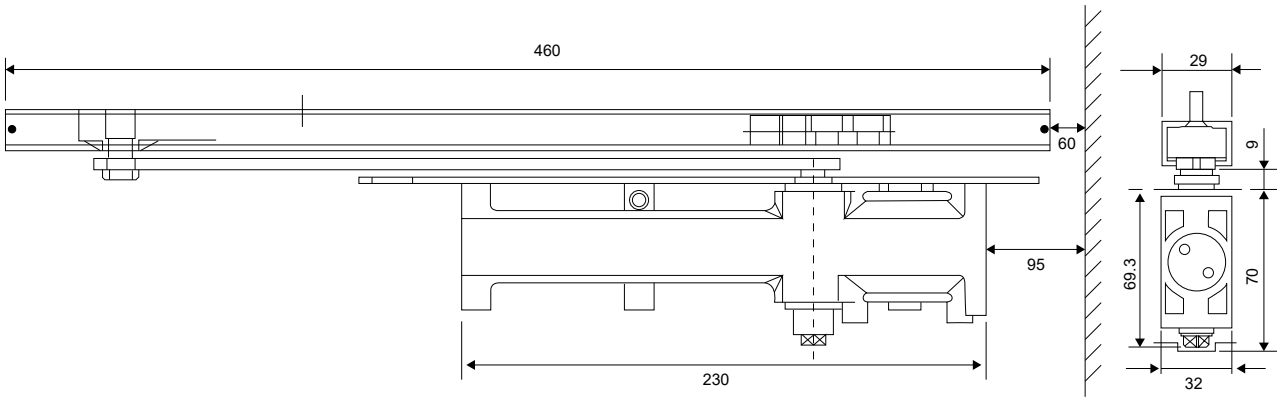

Function: 90° positioning and 180° non positioning

ZT-A007

ERIES DOOR CLOSER

Model	Material	Surface Treatment	Color	Max door weight	Max door width	Dimensions & Hole Center Spacing
ZT-A007	Aluminum Alloy	Spray painting	Silver	65kg	1000mm	Door Thickness > 32mm

Power level \ 3#

- ★ Double speed full-section control(180°-15°)door closing speed adjustable, (15°-0°) lock-entering speed adjustable.
- ★ The body is quality die-cast aluminum alloy,with 3-layer bright paint protection.(The color can be customized)
- ★ Quality alloy steel gear; piston features additional 3-process precision treatment for assured product quality.
- ★ Adopts imported sealing ring, needle bearing and high-performance spring structure design, which greatly increase leakage prevention, low-temperature and mechanical properties, so that the door closer is more stable and reliable.

ZT-A008

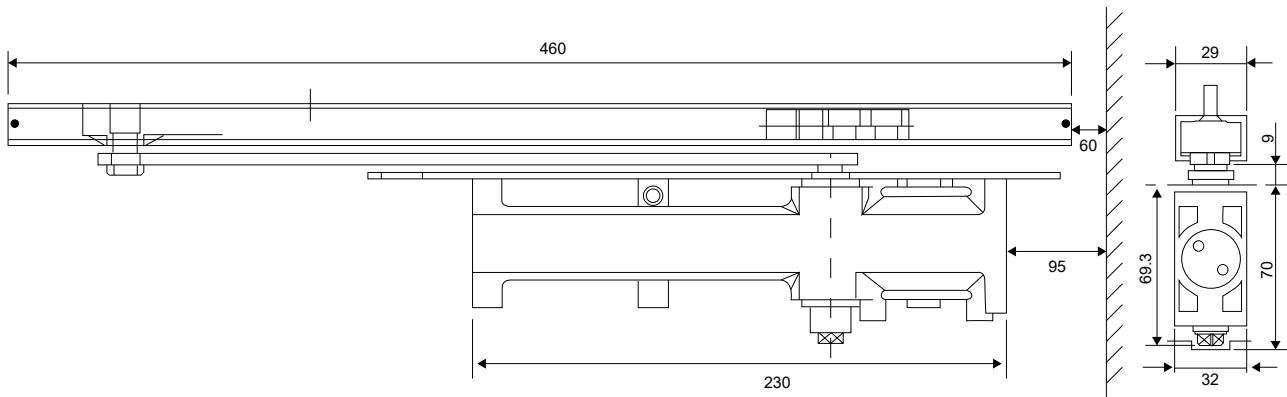

SERIES DOOR CLOSER

Technical data

- All metal &plastic door
- Max door width | ≤ 1000mm
- Max door weight | ≤ 65Kg
- Function: 90° positioning and 180° non positioning

Model	Material	Surface Treatment	Color	Max door weight	Max door width	Dimensions & Hole Center Spacing
ZT-A008	Aluminum Alloy	Spray painting	Silver	65kg	1000mm	Door Thickness > 32mm

Power level \ 3#

- ★ Double speed full-section control(180°-15°)door closing speed adjustable, (15°-0°) lock-entering speed adjustable.
- ★ The body is quality die-cast aluminum alloy,with 3-layer bright paint protection.(The color can be customized)
- ★ Quality alloy steel gear; piston features additional 3-process precision treatment for assured product quality.
- ★ Adopts imported sealing ring, needle bearing and high-performance spring structure design, which greatly increase leakage prevention, low-temperature and mechanical properties, so that the door closer is more stable and reliable.

ZT-A009

ERIES DOOR CLOSER

Technical data

- All metal &plastic door
- Max door width | ≤ 1000mm
- Max door weight | ≤ 65/85Kg
- Function: 90° positioning and 180° non positioning

Model	Material	Surface Treatment	Color	Max door weight	Max door width	Dimensions & Hole Center Spacing
ZT-A009	Aluminum Alloy	Spray painting	Silver	65kg/85kg	1000mm	Door Thickness > 32mm
